Luxury French Windows & Doors

Craftmen at heart

“In the tradition of fine French homes, windows are considered much more than a simple framework; they represent precious effects that grace a façade, connecting the inside and the outside. We are proud to perpetuate the art of opening windows inward, celebrating light, shapes and noble materials.

For five decades, I have had the privilege of redefining beautiful homes – focusing on the artisanal tradition of crafting excellence. Maison Janneau offers unique products, reflection of a lifestyle and a willingness to think outside the box.

The transmission of our exceptional know-how through the years has allowed us, today, to become one of the leading French companies for windows.”

Why Maison Janneau

UNIQUENESS

Experience the transformative window system of opening inward. Authentic French windows are very easy to operate, and you can open them fully or partially, thanks to the tilt-and-turn option. They offer a seamless integration of indoor and outdoor spaces and there is no better way to improve your home's air quality.

VERSATILITY

Our windows and doors have a timeless look that can enhance the appearance of any home. They are available in a variety of styles and finishes that best fits your home's design, from classic to modern, using only the best wood and steel materials.

DURABILITY

Our products are long-lasting because they are designed to withstand the element, making them a good investment for your home. A tightly sealed structure combined with first-rate glass provide exceptional insulation.

ELEGANCE

Our craft carries centuries of elegance, from cross window style of the renaissance, to XVIIIth century 'gueule de loup' to contemporary finesse. Our products add the je ne sais quoi to exterior and interior design.

“La beauté
plaît aux yeux,
la douceur
charme l’âme.”

"Beauty pleases the eyes, sweetness charms the soul."

“L’élégance, c’est quand l’intérieur est aussi beau que l’extérieur.”

«Elegance is when the inside is as beautiful as the outside.»

COCO CHANEL

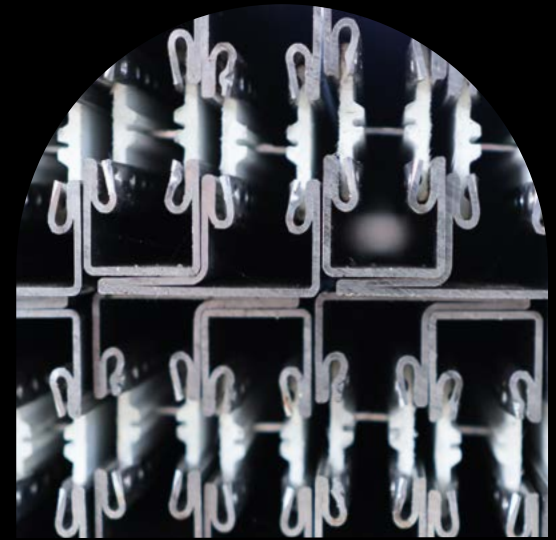

Refined Materials

Wood

Steel

Our Versailles and Lafayette windows and doors are made with either red exotic wood (such as Moabi) or a French oak provided by forests that respect the FSC label.

These species have been chosen for their performances, as they are sturdy and resistant against deformation.

Moabi's density: 0.87.

French oak's density: 0.74.

Furthermore, our wood species are naturally protected from insects, fungus and humidity, and they receive a specific solvent-free treatment against tannin stains.

Steel is an excellent material for windows and doors as it allows the biggest dimensions on the market and is three times stronger than aluminium.

To enhance its performances, all our steel products are galvanized, meaning they can be used on shores, and thermally broken, to protect from heat, cold and noise.

They are also available in stainless steel (brushed or polished), corten and bronze look alike.

Operating System

As shown previously, our uniqueness also comes from our operating system: indeed, French windows open inwards. They are very easy to operate and only need one hand to open fully. This French art-de-vivre allows a better connection with the exterior, improves ventilation and air quality, and makes it easier to clean the window inside and outside.

Maison Janneau's products can be installed from the outside, from the inside, and even between the wall,

which gives more choices in terms of interior and exterior aesthetics, if you wanted to add a ledge for flowers, for example.

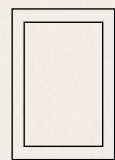

They also feature the tilt-and-turn system, which is using a rotating hinge system and utilize a single handle for all opening and closing functions. It can tilt inwards by pivoting on the bottom hinges or fully swing-in.

Security Features

Enhanced security: our windows and doors offer improved security features because of the inward opening. Since the locking mechanisms are located inside the house, it can be harder for potential intruders to break in from the outside. Our products are secured with several locking points known as mushroom heads, crémones, tamperproof handles, and laminated glass, all available as options.

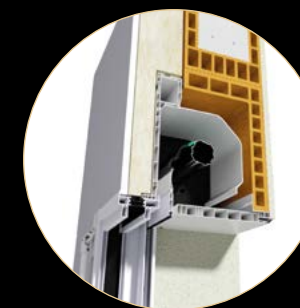

Shutters & Screens

If you are looking for shutters or insect screens for your project, Maison Janneau has developed an exterior roller system that will fit our windows.

WINDOW-MOUNTED SOLUTION
This system is installed on the outside of the window frame. Innovative designs and customization options allow it to be tailored to your project.

For an elegant and flawless façade, a built-in roll is the right choice. The discrete mounting system allows the mechanism to be hidden above the window and concealed within the wall cavity..
