

FÉRET
PARFUMEUR
Depuis 1878

A family history of French cosmetics

The history of Féret cosmetics is above all a family story: a family that has been creating and manufacturing skincare products in France since 1878!

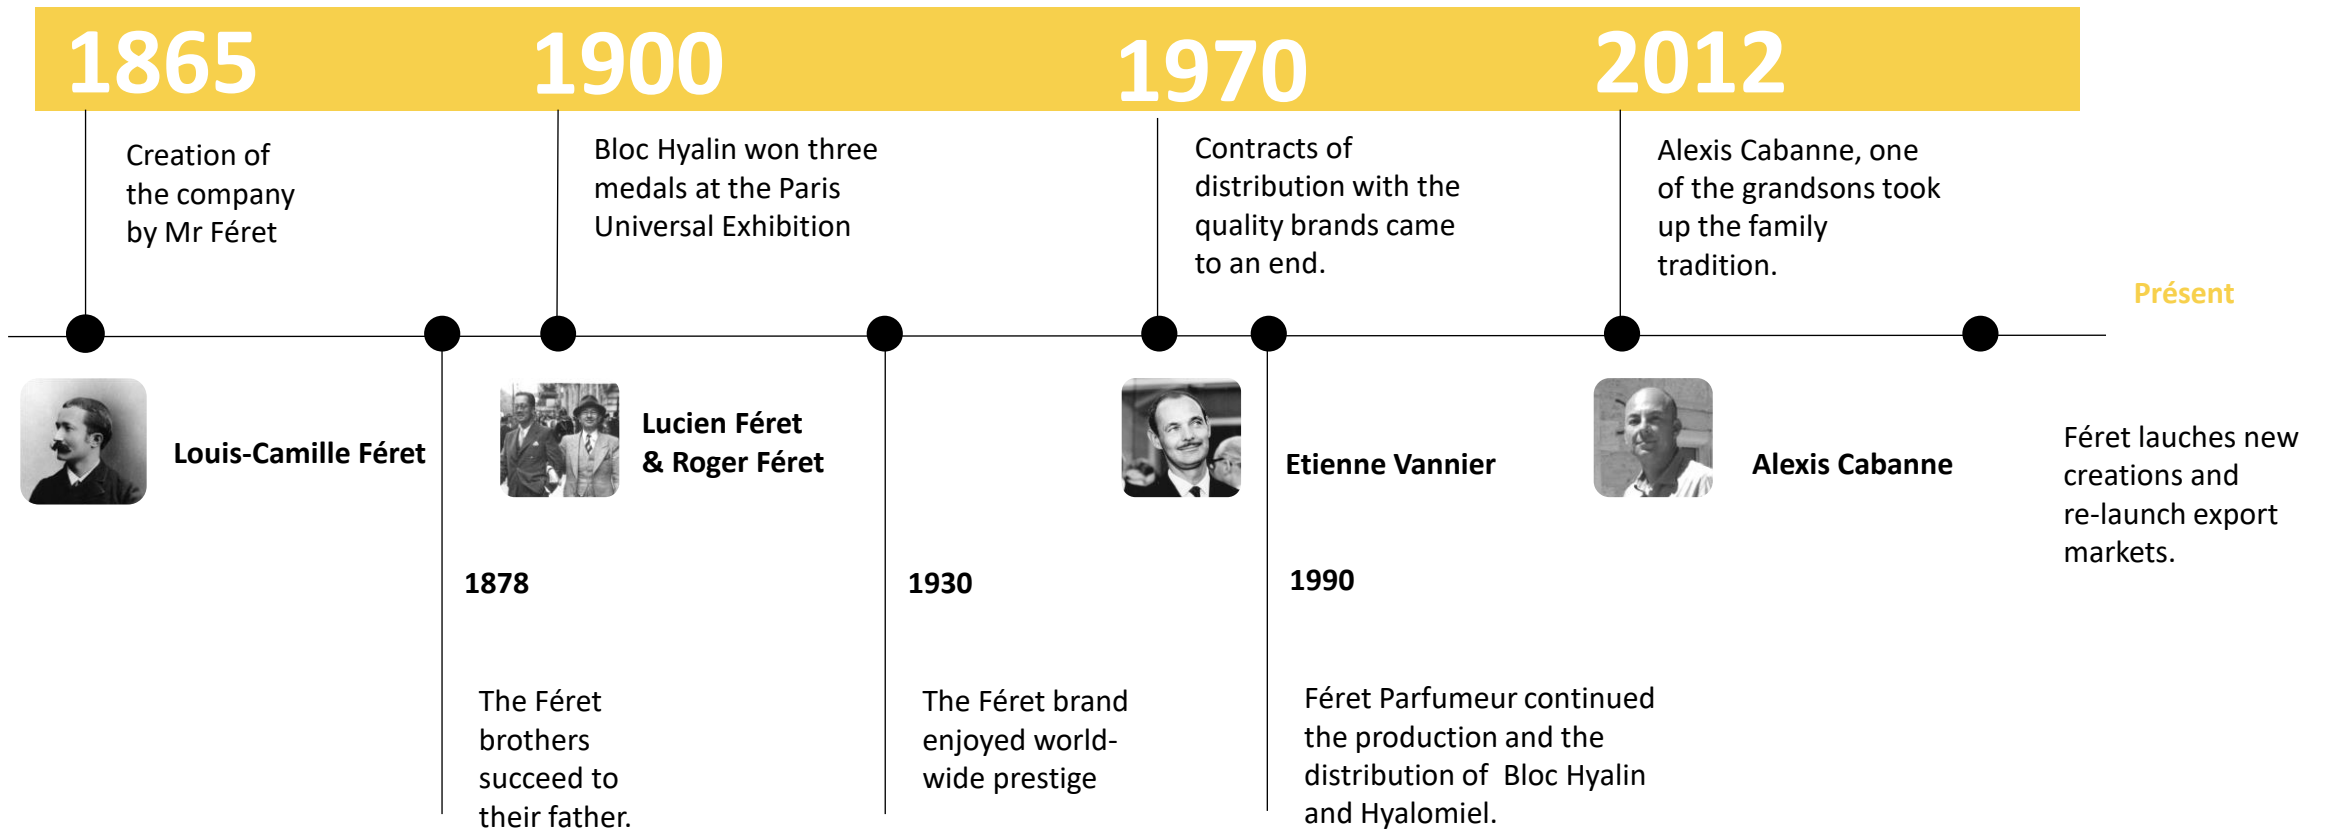

In 1878, the Féret brothers, Lucien and Roger succeeded their father, a distributor of major cosmetics brands, and manufactured **Bloc Hyalin** – this 100% natural alum stone won three medals at the 1900 Paris Universal Exhibition – and **Hyalomiel** - a jelly with honey extract and glycerin to moisturize and repair the skin.

Based in Cognac, the century-old family brand Féret Parfumeur has inherited for several generations a rare know-how and perpetuates the taste of the French Art-de-Vivre.

From father to son

It was Alexis Cabanne, **great-great-grandson of the founders, who took up the torch in 2012** and continues to distribute original Féret Parfumeur products worldwide.
