-
- You are ready to consume wine with the precise calculation of wine aeration, as soon as the bottle is open
 - The technology respects the nature of the wine and does not interfere with it (no chemicals). Only ambient air is injected into the poured wine, preserving the content of the bottle.
 - A bottleneck sensor
 - The aerator fits 75cl wine bottles with a standard neck.

Technical sheet

The Aveine aerator is adjustable and allows instant aeration of wines from 1h to 24h. It reveals the wine's flavors instantly. It is designed to fit directly onto standard 75cl bottle necks. It can be used as a stand-alone device thanks to its touch screen during a wine tasting session, or with the help of the dedicated free mobile app. Its customized high technology is based on the Nordic Semiconductor nRF52832 and is therefore capable of communicating with the Bluetooth 5 standard and can be updated. All materials comply with food standards.
