

P A R I S

Fabricant français de mobilier d'extérieur
Usine implantée à Belleville-en-Beaujolais

Carried by an entrepreneurial family spirit and the desire to showcase excellence “à la Française” on the contemporary design scene, EGO Paris adorn the most beautiful outdoor spaces, worldwide, with its intelligent and elegant premium outdoor furniture.

Human size company and large scale ambitions

- **The “House” EGO Paris : a family adventure**
The Sommereux brothers gathered in 2004 in order to create the EGO Paris premium outdoor furniture brand, with the common desire to live an adventure, both human and entrepreneurial. Very quickly, they found their marks: one at the company’s management, the other at the production, developing a know-how around the aluminium, the noble material in the industry of outdoor furniture

It's on their homeland in the heart of Beaujolais that the company EGO Paris was born, in the city of Belleville, near Lyon, with the production workshop where Yvan Sommereux, who oversees the production, can take a welding torch to rectify a detail and give a hand to the assembly unit.

- **Cocorico! An international recognition**

On par with French's best craftsmanship, the products of the brand's collections are also successful abroad, thanks to the "Art de vivre à la française" flag they carry and let the world envy us.

As a result, EGO Paris has gradually won the globe: Belgium, Germany, Switzerland, the United States, Chile, the Emirates ... and adorn with its collections the most majestic outdoor spaces, such as the Burj-al-Arab in Dubai, a 5-star hotel in one of the highest buildings in Dubai, recognizable by its unique sail-like design, the 3.14 Hotel in Cannes, the Cap Estel Hotel in Eze, the Fairmont Flame Towers in Baku, the Silversands Hotel in Grenada, the Park Hyatt Hotel in Buenos Aires and many others.

Exports sales represents 70% of its turnover, and has about 50 points of sales in Europe and about 100 worldwide. In the USA, the brand has a presence through its subsidiary in Atlanta that manages a dozen distributors covering the contiguous states and Hawaiï.

- **Agility and responsiveness to deliver products in record time**

Thanks to a controlled manufacturing process, EGO Paris has developed an agility that allows them to deliver the furniture to customers in a record time, without cutting any corners on quality. Sunloungers, dining sets, armchairs and other pieces are ready in record time: in only four weeks the customized furniture leave the factory and invest the most beautiful gardens and terraces.

Design at the heart of furniture

It is said that “the devil is in the details”:
EGO Paris does not omit any in the design of its products and remains faithful to its motto
“ingenuity, modularity, conviviality”.

- **Ingenuity: the touch of soul**

The pieces of furniture, extremely well thought out by the designers, present for the most part this extra soul and trick, which makes them essential. Similar to this coffee table from the KAMA collection, whose trays raise in no time in order to work on a computer or to have lunch there without having to bend over excessively. The dining table of the EXTRADOS collection, with airy lines, comes with table runners that can be accessorized at will and become plants tray, cutting board or ice bucket to refresh the bottles of a festive coming event.

- **Modularity: the furniture of which you are the architect**

No more imposed sofa configurations: EGO Paris offers now collections of which you can be the architect. Some seating modules or a subtle set of cushions allows you to create outdoor sofas, sunloungers, armchairs, islands of relaxation or ottomans: the only limit is the space you have.

- **The designers in the spotlight**

5.5 Design Studio, Thomas Sauvage, Fabrice Berrux. EGO Paris surrounds itself with soaring creative designers in order to reinvent themselves and seduce more and more prescribers, architects, interior designers, landscapers and a clientele of prestigious hotels and individuals. Not surprisingly, the brand has received several illustrious awards such as the prestigious “RED DOT Design Award” for the TANDEM Sunlounger (design Thomas Sauvage), and the NYCxDesign best Product Award in the Outdoor category for the NESTED CABINS (design Dorothée Noirbent).

All combinations of customization

Because tastes and projects are countless, EGO Paris is committed to ensuring that everyone can affix their print foot to customize its furniture, thanks to an incredible choice of fabrics, materials, colours, finishes, thus brings a breath of fresh air and inspirations to this high-end furniture. Among the provided materials: Corian[®], teak, resin with a concrete effect, ceramic, Batyline[®] mesh. As for fabrics, marine grade Vinyl, Batyline[®], Stamskin One[®], and fabrics chosen from among the best suppliers: Docril[®], Elitis, Serge Ferrari. Without forgetting the color chart: fifteen colours can be used in matt lacquers (Fine-Textured) or shiny (Semi-Gloss) versions.
