

MAISON TISSERANT

Lighting & Furniture

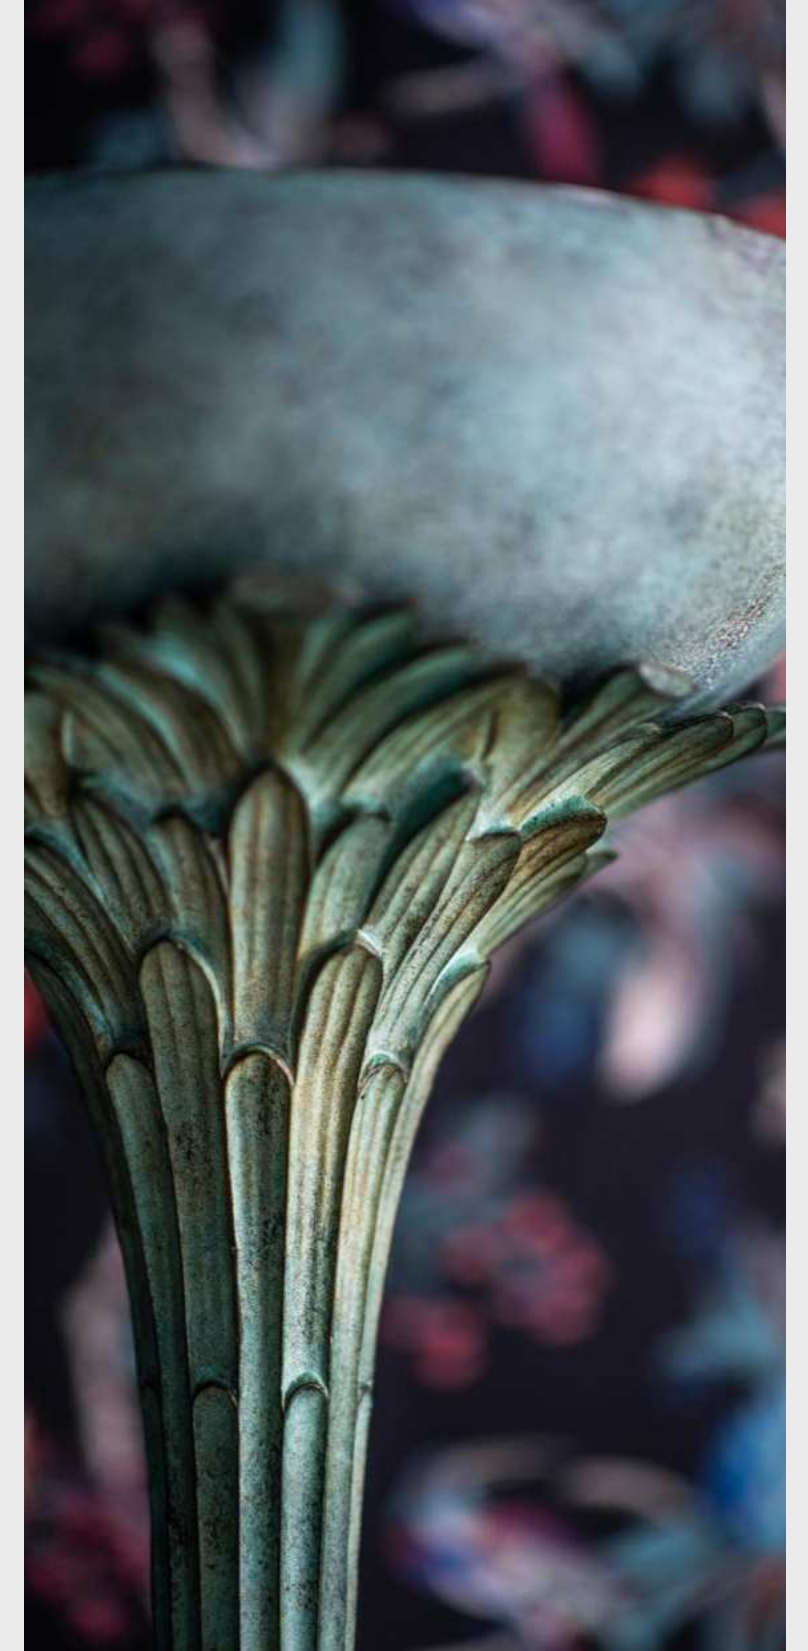

ABOUT OUR

Company

At Tisserant, we specialize in crafting bronze lighting and furniture that are both functional and aesthetically refined for public and private clients. By collaborating with architects, interior designers, and decorators, we help transform interiors into elegant and harmonious spaces, combining exceptional craftsmanship with timeless design.

TIMELINE

Émile Tisserant wins an award at the Exposition Internationale des **Arts Décoratifs**. The award recognized his budding talent and marked his first steps on the French decorative arts scene.

FIRST HONOURS

1925

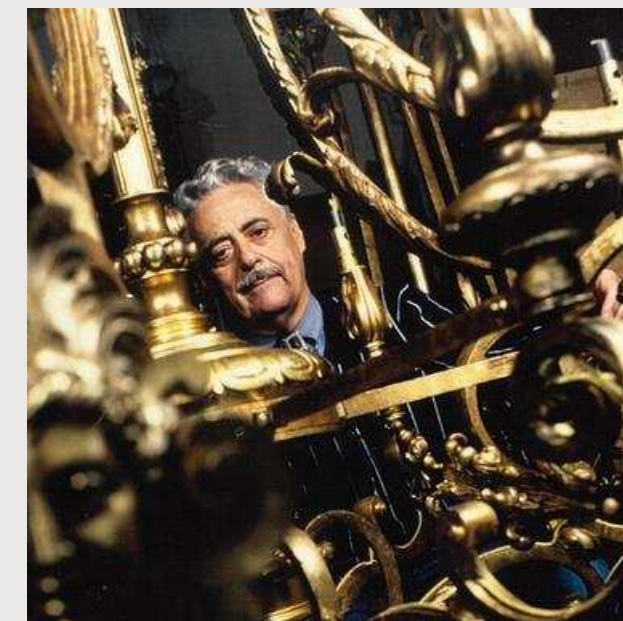

THE WORKSHOP IS BORN

Driven by a precise **vision** of the bronze craft, he opened his own **atelier** in Paris. His creations soon attracted attention. He worked alongside Jacques-Émile **Ruhlmann** and took part in a number of emblematic projects, including the lighting for the **ocean liner Normandie**.

THE BEGINNING

1930

He then extended his career by working alongside **Armand Albert Rateau**, one of the most influential figures in the **Art Deco** style of the early 20th century. As Rateau's model maker, Émile Tisserant played a crucial role in bringing to life the designer's bold and **innovative** visions. This formative collaboration marked the beginning of a journey defined by exceptional **craftsmanship** and artistic ambition.

Bernard Tisserant was renowned for his exceptional **mastery of bronze**. With precise technique and deep material knowledge, he elevated each piece through expert **chiseling** and **finishing**. His expertise played a key role in preserving and advancing the family's artisanal **legacy**.

THE ART OF PRECISION

1974

TIMELINE

Antoine Tisserant revitalized Tisserant Art & Style by blending his family's bronze **craftsmanship** legacy with bold, contemporary design. He reproduced emblematic pieces while innovating new collections, expanding the brand **globally** and sharing French artisanal **excellence** with a new generation of connoisseurs.

THE RISE

1989

Tisserant Art & Style enters a new era under the leadership of **Marie** and **Pierre** Tisserant, the fourth generation at the helm. Building on a rich heritage of **bronze** craftsmanship, they bring fresh **vision** and **energy**, fostering dynamic collaborations with **designers** from around the world. While honoring the house's time-honored savoir-faire, they champion **innovation** and **creativity**, shaping exceptional pieces that reflect both tradition and contemporary design excellence.

CONTEMPORARY EXCELLENCE

2023

As it approaches its centenary, Tisserant Art & Style enters a new chapter. Anchored in a rich heritage and guided by a forward-looking vision, it embraces modern **technologies** such as 3D modeling to push the boundaries of creativity. By blending tradition with **innovation**, they uphold the values of excellence and sustainability, shaping the creations of tomorrow while honoring the craftsmanship of the past.

OUR SAVOIR FAIRE

Restoration of bronze objects

"Where refinement is a requirement, our light becomes self-evident."

We've also had the privilege of contributing to the restoration of old lighting fixtures in world-renowned **heritage sites**, where each intervention requires a subtle dialogue between **memory**, contemporary requirements and light.

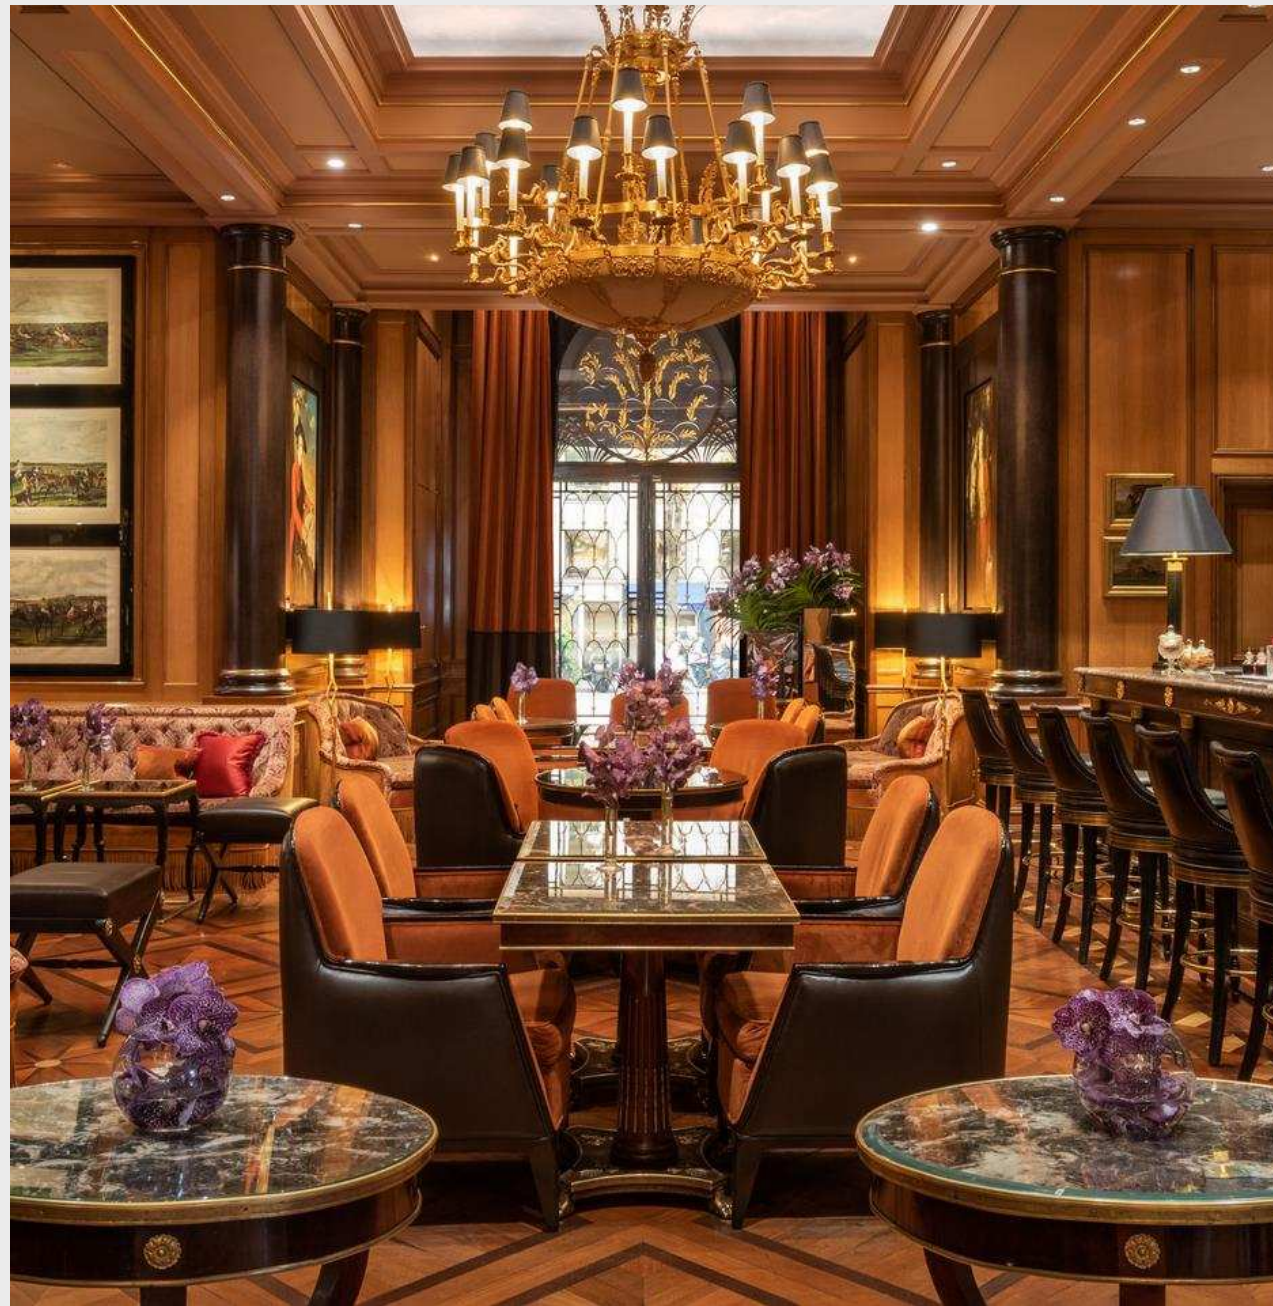

In confidential boutiques, private spaces or emblematic locations, our creations makes its presence felt without ever imposing itself. It accompanies, shapes and reveals, without ever distracting from the **essential**.

With each creation, we seek to offer a soft, lived-in light, sculpted with exacting standards, that embraces the lines of the site and respects its **soul**.

OUR FINISHED

Projects

PRESTIGIOUS LOCATIONS

In the hushed lounges of grand **Parisian** palaces, the confidential suites of exceptional **hotels**, or the majestic halls of **historic** residences, our pieces are integrated with discretion and refinement. They reveal the architecture, emphasize the volumes and magnify the materials with a signature light.

Our expertise also extends beyond **national borders**, to luxury villas, private residences with breathtaking views, and royal palaces steeped in **history**. Each space receives custom design, respecting its identity and ambience.

In the world of **luxury** hospitality, our creations are an integral part of the **atmosphere**. They don't just illuminate; they tell a story, accompany the experience, and nurture a sense of well-being and exception.

DESIGN

At Tisserant, we see **tradition** not as a burden, but as an **impetus**. A fertile foundation that nurtures ever-evolving creativity. It is by drawing on our ancestral **savoir-faire** that we are able to welcome the most contemporary expressions of design with accuracy and exacting **standards**.

Our approach is based on a constant dialogue between **heritage** and **contemporary** creation. For several years now, we have been collaborating with **designers** from the contemporary scene, whose singular visions invite us to push back the boundaries of our craft. These encounters nourish our constant desire to **renew** ourselves, to question materials, light and form - and to open our atelier to unexpected aesthetics.

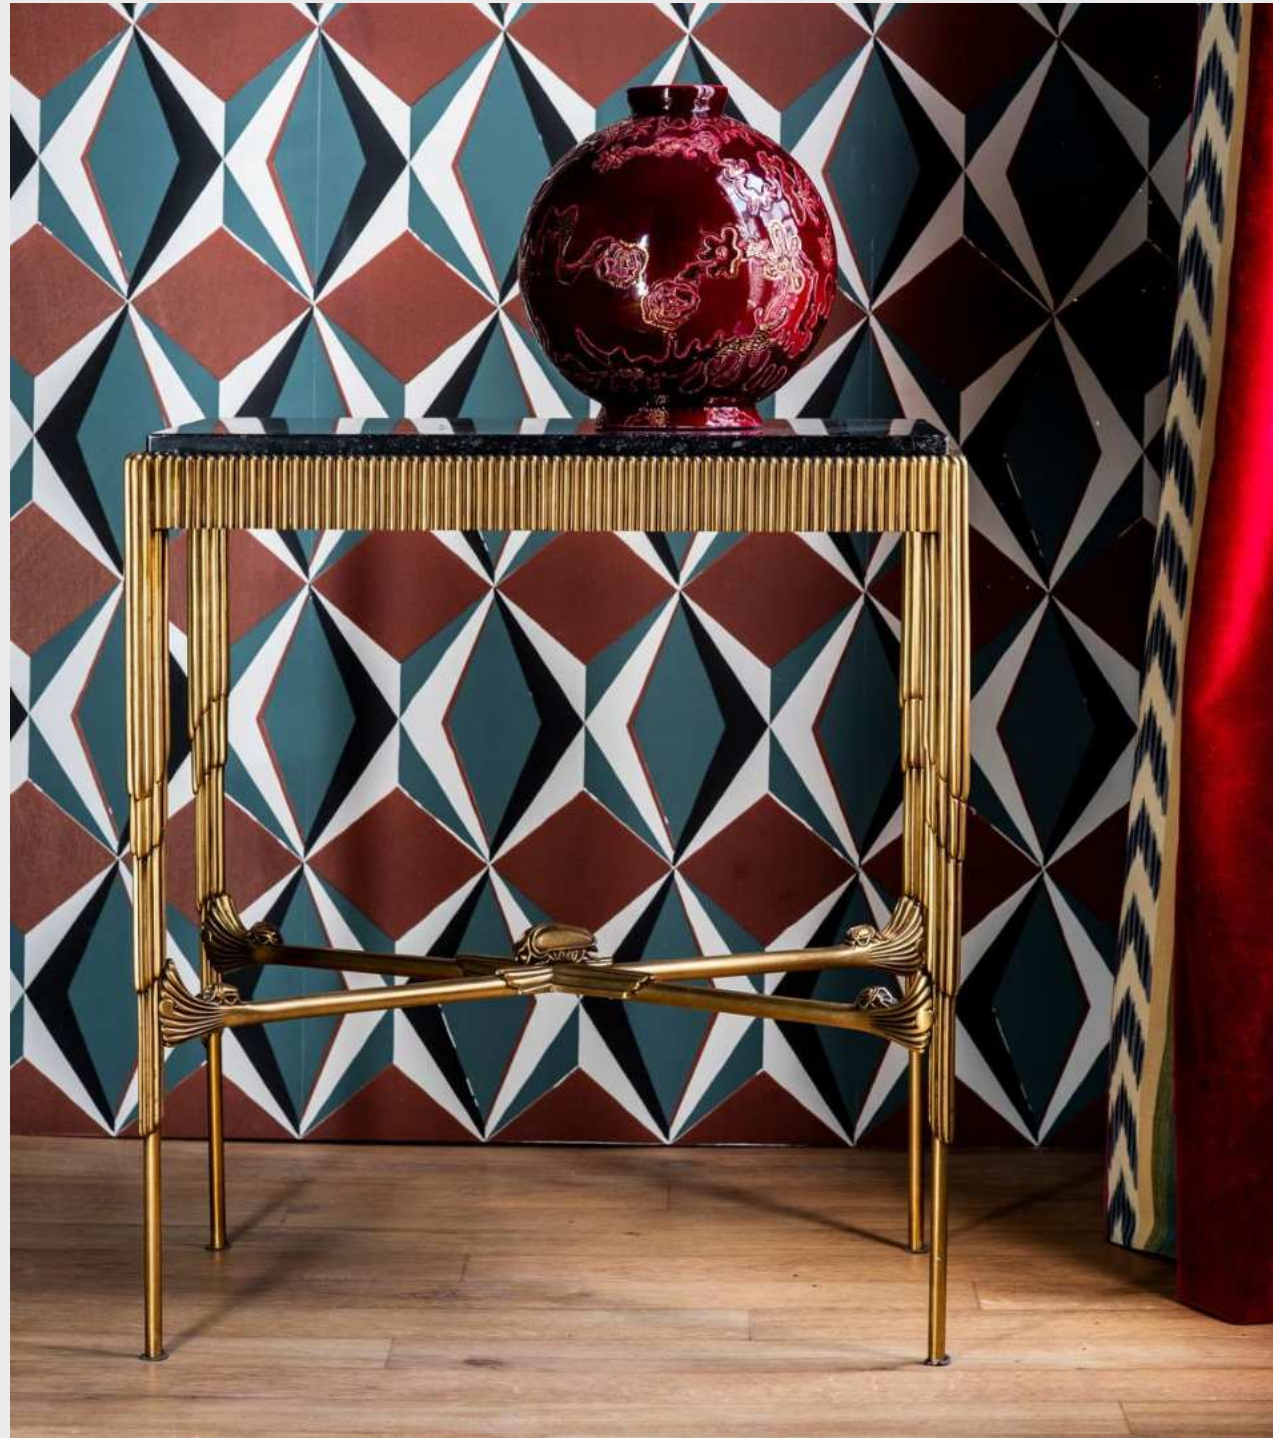

Whether diverting natural materials such as **ostrich eggshell**, transforming bronze into a graphic surface, summoning the imagination of ancient myths in sculptural pieces, or designing **technical lamps** specially designed for jewelers, each project is an opportunity to experiment, to innovate, to confront gesture with technology. These lamps, in particular, are designed to bring out the brilliance of **precious stones**, offering a light that magnifies every facet of the jewels, while enhancing the art of jewelry as a whole.
