motac neuroscience

Transforming CNS Research into Therapeutic Solutions

ABOUT US

Motac Neuroscience is a contract research organisation providing research services to pharmaceutical and biotechnology companies developing innovative treatments for central nervous system disorders through world-class science and technology.

With state-of-the-art facilities in Europe and Asia, Motac Neuroscience offers expert consultancy, flexible laboratory research using both small and large animal models, and advanced stereotactic techniques.

OUR CUTTING-EDGE EXPERTISE

Preclinical Disease Models
Rodent and non-human primate models

Translating Preclinical to Clinical Research
Proof-of-concept and IND-enabling studies

Translational Endpoints
Behavioural assessments, imaging, biomarkers, histopathology

Scientific Excellence
Hundreds of peer-reviewed publications by Motac scientists

Therapeutic Targets:
Proteinopathies (PD, MSA, AD, PSP, HD and ALS)
Movement & Cognitive disorders
Spinal Cord Injury

World-class Team
Renowned specialists in neuroanatomy, neurophysiology, neuropharmacology, and neuropsychology; leaders in Parkinson's disease and dyskinesia research

Why work with Motac Neuroscience

- ✓ Decades of innovation in disease modelling and therapeutic delivery
- ✓ Strategic partnerships worldwide
- ✓ State-of-the-art infrastructure and a dedicated scientific team
- ✓ Commitment to quality and compliance with EU laboratory research standards
- ✓ Flexible research solutions and tailored study designs aligned with clients' development strategies
