

Full services to support small molecules drug substances development from research to commercial manufacturing

- Custom APIs
- Custom Intermediates (non-GMP & GMP) & Regulatory Starting Materials
- Potent APIs & Intermediates
- Generic APIs

A global and flexible network of GMP and non-GMP manufacturing sites

Our Six Technological Platforms to accelerate your development and industrialization

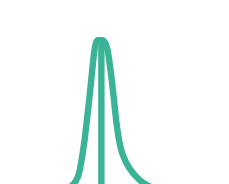

Seqens BIOTECHNO

Microorganisms, molecular optimization and bioproduction of biological compounds

Seqens MULTICAT

Catalyst screening, selection and use in chemical processes of complex reactions : Metacatalysis, Biocatalysis & Photocatalysis

Seqens ANALYTICS

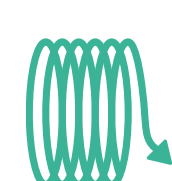

Full characterization of substances & standalone analytical services offering including **nitrosamines**

SeqensUP!

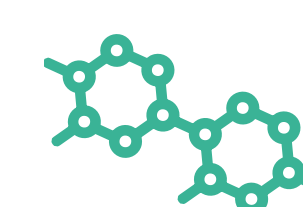

Empower your molecule

An integrated offer with **Solid state, preformulation, ADME-tox, formulations prototypes**

SeqensFAST

Flow Chemistry for Agile & Sustainable Transformation to target safe, efficient and selective synthesis

Seqens POLYMERS

Custom Development and Manufacturing of Polymers for Advanced Specialties, Drug delivery & Medical Devices

Why choosing SEQENS?

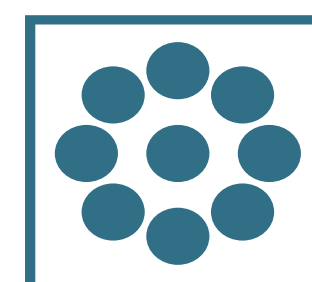

Partner of choice

We put our expertise and know-how at the service of your success

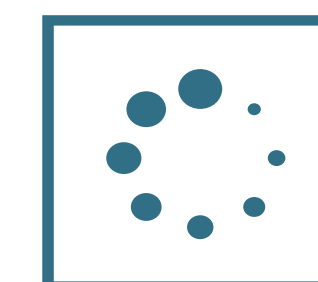

Capacities

Our industrial capabilities allow us to meet all challenges with performance and innovation

Proximity

Our local presence and customer-first mindset guaranteeing personalized and responsive support

Flexibility

We adapt our services to your specific needs and market developments
