

FAST-TRACK YOUR PIPELINE WITH PRECLINICAL EXCELLENCE

in vitro & in vivo services

Premium pharmacology services for drug efficacy testing

>

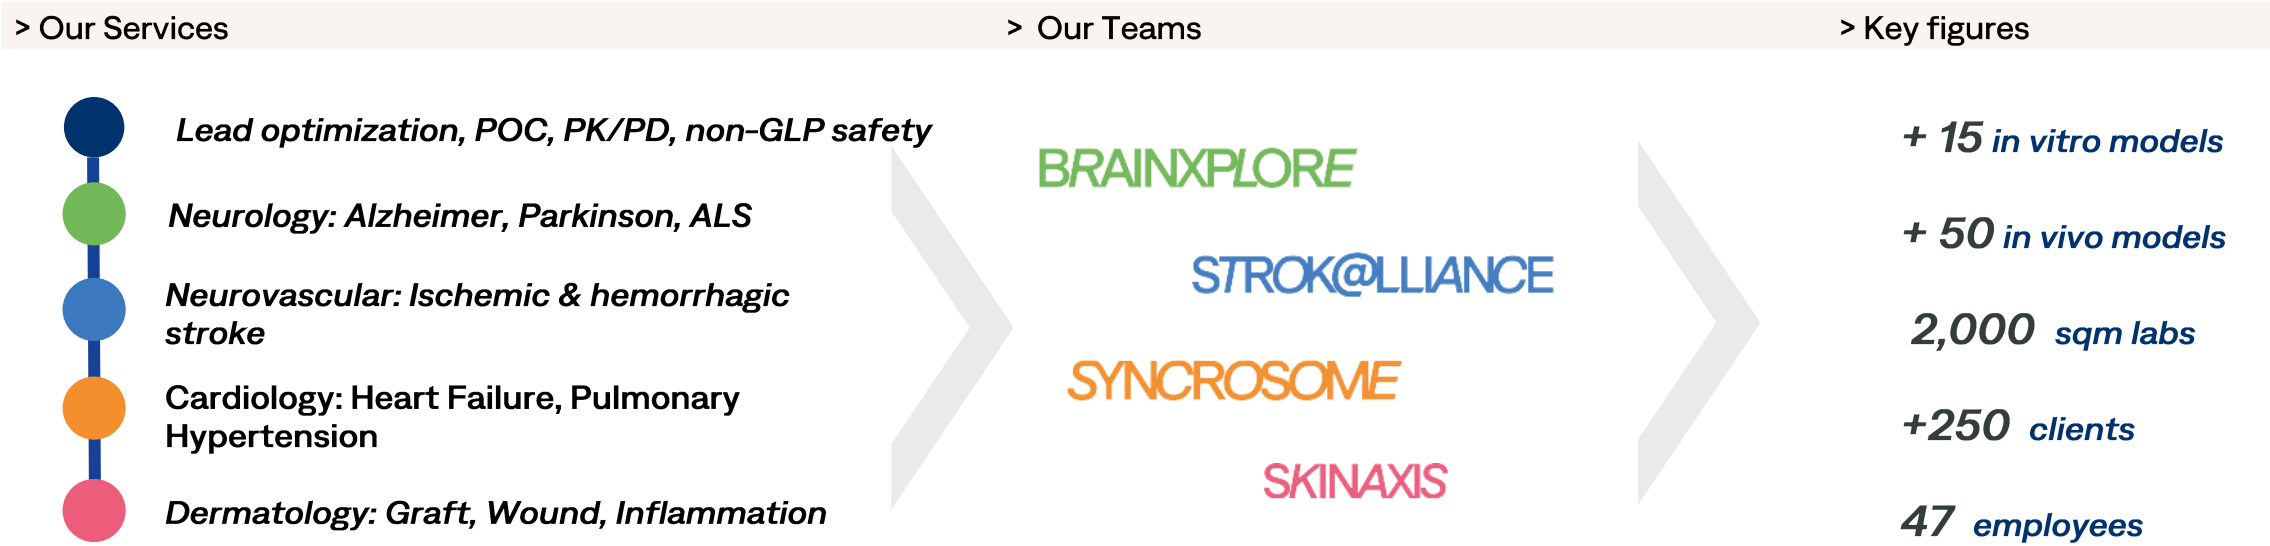

ETAP-Lab is a leading CRO offering with **robust** and **cost-effective** preclinical pharmacology services.

>

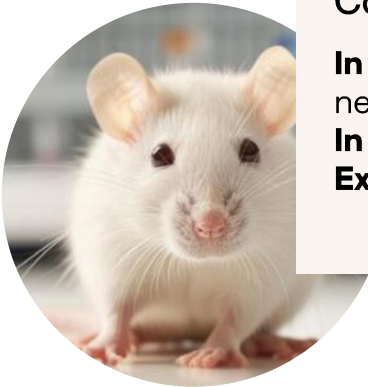

ETAP-Lab is a **full-service** CRO specialized in **Neurology**, **Dermatology** and **Cardiovascular** diseases, providing end-to-end support through **in vitro assays**, **in vivo models**, and **ex vivo analytical** services.

>

ETAP-Lab's services strengthen your non-clinical studies by combining **scientific expertise** with **industry-grade standards** to secure and advance your preclinical pipeline.

ETAP-LAB Preclinical CRO has a robust preclinical positioning

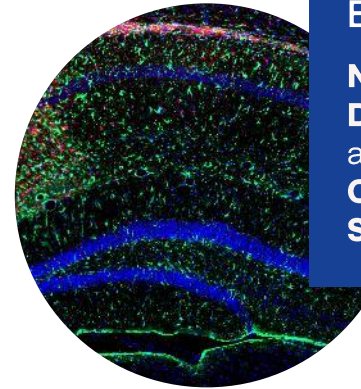

Core services

In vitro assays: Cell-based studies for neurodegenerative diseases

In vivo efficacy models: mice, rats, pig models

Ex vivo analysis: Imaging, biomarkers, IHC

Expertise areas

Neurology : Ads, PDs, stress, anxiety

Dermatology : Skin graft, wound healing, psoriasis, atopic dermatitis

Cardiology : Heart failure, pulmonary hypertension

Stroke : Ischemic & hemorrhagic

Facilities & equipment

Advanced imaging platforms: 7T-MRI, PET-Scan, cardio-echography, dermoscopy

In vivo lab: 10 husbandries, 3R compliant

In vitro lab: 2D hiPSC & microfluidic platforms

Analytical lab: Immunohistochemistry, bioassays

Client typology

Pharmas & Biotechs: Companies developing small molecules, mAbs, and biotherapies

Medtech: Companies developing medical devices & biological substitutes

A proven CRO with trusted expertise

Your preclinical partner
