

FAST-TRACK YOUR PIPELINE WITH PRECLINICAL EXCELLENCE

in vitro & in vivo services

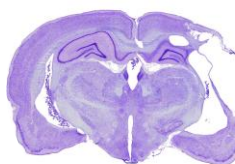

ETAP-LAB is an **independent preclinical CRO** that provides efficacy testing and pharmacology services to pharmaceutical, biotechnology and medtech companies.

ETAP-LAB has 35+ years of expertise with 4 services:

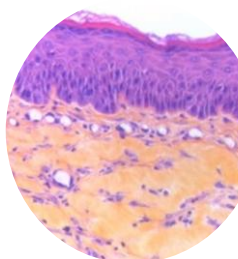

BRAINXPLORE

Dedicated to Neurology and Psychopharmacology with in vitro and in vivo models of Alzheimer, Parkinson, ALS, depression and anxiety.

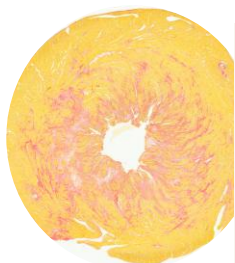

STROK@LLIANCE

Dedicated to Stroke with more than 10 models of both ischemic and hemorrhagic stroke addressing tissue reperfusion, neuroprotective, and brain plasticity improvement strategies.

SKINAXIS

Dedicated to Dermatology including both inflammation models (psoriasis, atopic dermatitis, hyperkeratosis,...) and wound healing (different shape, size, depth in healthy or diabetic context; skin grafting).

SYNCROSOME

Dedicated to Cardiology including HFpEF, HFrEF, Pulmonary Artery hypertension, Systemic hypertension and peripheral thrombosis.

ETAP-LAB's services are designed to support drug discovery phases ranging from in vitro lead optimization to non-GLP animal testing (POC, PK/PD, non-regulatory safety pharmacology), to evaluate your drug candidates (small molecules, antibodies, cell therapies...) and medical devices.

ETAP-LAB's services rely on state-of-the-art facilities and equipment, including high-content imaging, in vivo imaging platforms (MRI, PET-scan, echocardiography, dermoscopy), microsurgery capabilities, and comprehensive immunohistochemistry and bioassay readouts.
