EUROPEAN INNOVATION COUNCIL

Europe's biggest deep-tech investor

The European Innovation Council (EIC) is Europe's flagship innovation programme to identify, develop and scale up breakthrough technologies and game-changing innovations.

The EIC has a budget of EUR 10.1 billion to support innovation throughout the whole lifecycle, from early-stage research to proof of concept, technology transfer and the financing and scale up of startups and small companies.

The EIC functions under the following schemes:

EIC Pathfinder supports research teams to research and/or develop emerging breakthrough technology.

EIC Transition supports the maturation of a novel technology and development of a business case to bring it to market.

EIC Accelerator supports funding and investments through the EIC Fund for individual start-ups and small companies to develop and scale up their breakthrough innovations.

EIC STEP SCALE-UP offers equity only funding to start-ups, SMEs and small mid-cap for high-risk innovations.

The EIC strives to ensure that financial support is only the beginning of the awardees' journey. This is why they provide all EIC-supported projects and companies with access to a range of **Business Acceleration Services (EIC BAS)** worth up to EUR 50,000 to boost their innovation and growth at any stage of development for their activities, and of the EIC research and innovation cycle.

They are there to equip innovators with a wealth of resources designed to unlock unique mentoring and training opportunities, global partnerships, innovation ecosystems, and much more.
