朝阳环境
CHAoyang ENVIRONMENT

Activity

Beijing Chaoyang Environmental Group Co., Ltd. which belongs to Chaoyang District of Beijing Municipality, occupies an area of nearly 3 km², and is the only solid waste treatment and resource recycling market-oriented operation enterprise in Chaoyang District of Beijing, with business involving the treatment of municipal domestic waste, food/food waste, hazardous wastes, construction/renovation wastes, and medical wastes, recycling of renewable resources, operation of environmental protection facilities, and technological development and promotion. It has innovatively put forward the concept of collaborative treatment of municipal waste in parks, and the Chaoyang Recycling Economy Industrial Park in Beijing has taken the lead in realizing the collaborative treatment of municipal waste from multiple sources and types on a large scale, with a daily capacity of more than 10,000 tons of various types of waste, and near-zero comprehensive carbon emissions, and has built the Clean Incineration Center, which is included in the country's only case of clean incineration standards, and the largest kitchen waste treatment capacity in Beijing. It has built the Clean Incineration Center, which is the only case of clean incineration standard in China, the kitchen waste treatment plant with the largest treatment capacity in Beijing, the first construction waste treatment plant using PPP mode, the first medical waste treatment plant and material recycling center in Beijing, and is now constructing a

number of innovative projects for pollution reduction and carbon reduction and synergy, such as the largest food waste treatment plant in Beijing, the third phase of domestic garbage incineration, comprehensive utilization of biogas and integrated development of new energy sources projects.

Key figures

Turnover: 0.4 billion CNY

Staff: ~200 with 5 Chinese branches

Foreign branches: not yet

Type of products / solutions / technologies targeted:

1. **Import of advanced solid waste disposal equipment:** The Chaoyang Environment Group hopes to carry out technical exchanges and in-depth cooperation with French entities in solid waste disposal and resource utilization sector, to **import solid waste disposal equipment** in its park and upgrade and transform the park from domestic standards to international standards.

2. **Technical exchanges and R&D cooperation:** The Chaoyang Environment Group hopes to carry out technical exchanges and R&D cooperation with French entities in solid waste disposal and resource utilization sector, especially in the areas of **waste incineration, food waste/kitchen waste treatment, construction waste resource utilization, recycling and utilization of waste materials, and development of new energy sources**, etc., and to **introduce French advanced solid waste disposal and resource utilization technologies and explore together the international market;** to **invest in R & D projects on multi-source solid waste disposal and resource utilization and new energy development** with relevant French entities.
