

NEPTING

Payment on the move

Reinventing Payment for a Connected Retail World

NEPTING is the first fully cloud-native payment platform designed for global deployment and real-time control across all sales channels. Engineered for today's retail challenges, our API-first platform enables seamless integration, rapid scalability, and a frictionless customer experience — in-store, online, unattended, and via SoftPOS (including Tap to Pay on iPhone).

Why Retailers Choose NEPTING

- **Omnichannel-Ready:** One platform for POS, SoftPOS, kiosks, and e-commerce
- **Real-Time Visibility:** Centralized dashboards and transaction insights
- **API-Driven Flexibility:** Fast integration with apps, ERPs, loyalty, and more
- **Scalable & Modular:** Adapt to any business model or store format
- **Enhanced User Experience:** Support for refunds, tips, DCC, QR codes, and more
- **Fleet Management:** Monitor, update, and configure terminals remotely
- **Merchant Self-Service:** Empower your teams with live configuration tools
- **Compliance & Data:** 13-month transaction archive and secure data flows

Retail Is Evolving Your Payment Platform Should Too

With Nepting, retailers unlock speed, simplicity, and control. Whether you operate hundreds of stores or sell across continents, Nepting gives you one unified interface to manage all transactions, all devices, and all channels — in real time.

The Cloud Payment Platform Built for Modern Retail

Connect with us to redefine your payment experience.
